

ABSTRACT

A cover and a dispenser for a tissue package, said dispenser comprising a tissue dispensing aperture and a manipulating opening, both opening into a tissue-containing space of the package. The tissue dispensing aperture is sized for dispensing one tissue at a time while separating a duty tissue from a successive tissue; and the manipulating opening is normally closed by a flap and is deformable to allow introduction of a user's fingers into the tissue-containing space, and wherein said tissue dispensing aperture and the manipulating opening are coverable.
